POINT

VIRIDIAN 
~ CHARGING AHEAD ~

charge your electric vehicle

charge point solutions for home or at work

safe, reliable homecharge installations

home

If you're considering an EV then you will need to be considering your charging arrangements at home.

Standard 3-pin wall sockets are less suitable due to the relatively long charging periods and so a dedicated EV charge point is recommended. This overcomes possible safety implications and can reduce charge time significantly.

- ✓ Safer and faster charging than a 3-pin wall socket
- ✓ Range of colours available
- ✓ All Installations carried out by certified Viridian EV Installers
- ✓ 3 year warranty
- ✓ Our charge points are approved for installation under the OLEV Homecharge Scheme which will save you 75% of the installation costs (up to £500*) *Conditions apply*
- ✓ Making it easy - Viridian EV will handle grant application & coordinate installation for you

work

Fast becoming important for businesses is the provision of EV charging facilities, whether it's for employee use, visitor use or for company vehicles - it's a good way to expand your green credentials and potentially add a revenue stream.

- ✓ Suitable for visitor or fleet charging
- ✓ Metering solution available for energy monitoring and expenditure reporting
- ✓ 3 year warranty
- ✓ 3-phase charge points available that can decrease charge time to 1 - 1.5 hrs

destination

Turn your organisation into a destination for EV drivers and offer customers another reason to give you their business. As more EV's take to the road you can increase the appeal of your business with the provision of a charge point.

become an accredited installer

Whether you're installing for commercial or domestic markets, we're looking for installers to join the Viridian EV network.

- ✓ Designed, manufactured, and tested by Viridian EV in the UK
- ✓ Easy to install to a wall or post
- ✓ One of the most compact units on the market
- ✓ Low maintenance

We use the highest specification components to ensure total reliability, ensuring you as an installer of our product don't have to return to site to put right parts that have failed.

visit viridianev.co.uk/Installers for more information

“

Numerous times we have had to revisit charge point installations that have required extra work because of parts failing – none of them have involved Viridian EV charge points.
